

Kindergarten

This term we learnt all about Minibeasts and the fantastic world we live in. We used Inquiry Learning to explore, question and build knowledge, through hands-on tasks.

Connecting and Contributing

We developed our inquiry skills by observing snails, asking questions and then finding answers.

Learning and Thinking

We asked:

Why are snails wet and sticky?

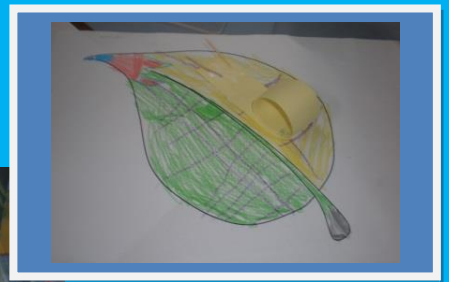

How do they move?

What can they move on? How can we check?

Communicating

We discussed our findings and increased our vocabulary exploring the language and presentation in fiction and non-fiction books

We tested our ideas and represented our ideas through art, drawing, discussion and play.

We used different tools and technologies to assist our learning.
