

# Pre-Primary

## Term 2

The Pre-primary students have had a wonderful term of learning and exploring. We can't believe we are half way through the year! We have been investigating bugs and insects, as well as books written by Eric Carle. Many of his books have insects as main characters! We have learnt that insects have exoskeletons, and their bodies are made up of a head, thorax and abdomen. In maths, the class has been busy measuring, creating patterns and counting. Fine motor skill development is an important part of the Pre-primary program and the students have many opportunities to thread, manipulate play dough, cut and draw. We are able to draw pictures with so much detail now!
