

Pre primary Term 3

This term we have been investigating the Solar System. We have designed and made rockets, learnt about the phases of the moon and designed a new constellation.

We like to start our day with movement. We dance, balance and sing to help us get ready for our morning activities. We love learning new guided dance routines, and we learn to do things such as crossing our mid-lines, knowing our left and right and moving in time to the beat of the music .
