

# Pre primary

## Term 4

We spent time investigating different countries from around the world. The class decided to create an African Savannah. The whole class worked cooperatively to make animals, trees, rivers and rocks.

The class enjoys using our outside verandah as an extension of the classroom. Now the weather is warmer the students can use the water trolley to take part in measuring activities. The students also attempted to create their own Panama Canal after watching a video on how it works.

Outside dramatic play with the babies under the trees. So much fun and a wonderful opportunity to role play and use imagination. The class also were set a challenge to create a boat out of foil to hold as many marbles as possible.
