

Year 1 2017 Term 4

English

We have been writing procedures, letters, lists and explanations. We have enjoyed writing letters and procedures with a Christmas theme in the last few weeks. We have been practising Reading Theatre and are looking forward to performing for in front of the class.

Religious Education

We have been wondering at the ability to work by caring for self, others and creation. We discussed that Jesus worked by caring for himself, others and creation. In our Advent/Christmas unit we have been preparing for the special time leading up to Christmas. We have illustrated the story of the birth of Jesus and discussed how people can show love as they help to prepare.

Maths

We have been learning about reading tables and graphs. We have conducted surveys in the class and recorded and discussed data. We continue to practice addition and subtraction as well as using number lines.

Term 4 Events

The Year 1 class were really excited about being part of the Sports Carnival and Interschool Carnival with the 'big kids'.
Basketball Clinic

Science

In Science we have been exploring the properties of different materials. We have been classifying and identifying materials, as well as selecting them according to their properties. We had fun observing how different materials change when warmed and were amazed at what happened to marshmallows when they were heated quickly. Luckily, we were observing with all our senses, because they were yummy!
