

Year 3 News

What have we been doing in Year Three?

In Year Three, we have been learning about the forces of Creation and how God is more powerful than all of these. We have been visiting the church and becoming familiar with the many objects we see there. We have been doing skip counting in Maths, and learning about odd and even numbers. We have been examining the properties of 3-D objects, and observing symmetry in our environment. We drew pictures of a secret island and made pirate treasure maps. In Science, we made protective hats from recycled materials and we have learnt about how the heart works. In Sport, we have been learning basic soccer skills.
