

# Year 3 News

## What have we been doing in Year Three?

We have been learning about traditional Irish musical instruments as part of the Famine Commemoration held in Dardanup.

In Year Three we have been learning about Position and Giving Directions in Maths, and we have been practising subtraction of two and three-digit numbers. We have been learning about fractions and we have been comparing and measuring area.

In our Religious Education lessons we have been discussing the forces of nature and the greatness of God who created them, as well as preparing for our Creation liturgy.

In Art, we made some pictures using things from nature such as twigs, leaves and sand. We have also been using fabric and coloured card to create pictures.

We have been learning to write procedures and we have been doing research for writing animal reports.

We love Science!
