Around the World
We have continued our journey around the world and have visited some more interesting places. We went to Italy and made some gigantic gelatos. We also went to India and made 3D elephants and we made beautiful tulip pictures when we went to the Netherlands.

English
We have been learning how to write narratives, and have written some great stories. We are getting very clever at using speech marks to show direct speech. We have also started reading groups and writing groups. We look forward to the group work each week, and work really well within our small groups!

Maths
We have been working out lots of vertical addition and subtraction problems. We have also been collecting data and graphing the results. We really enjoyed making a lolly snake graph. Of course, the best part was eating them!

Science
This term we are investigating materials. We have had lots of fun mixing together different materials and discovering what is made!

Religious Education
This term we learned about our souls. We imagined what our souls would look like if we could see them, and then created our own soul from plasticine.

Excursion
As part of our learning about things from the past in History, we went for an excursion to King Cottage in Bunbury. There was so much to see and learn about! We loved washing the socks on the washboards, and pumping water with the old-fashioned pump. We found the toilet very interesting, and were amazed that 7 children could fit into one tiny bedroom! After King Cottage we joined the Year 3 class at the Big Swamp Park for a sausage sizzle and play. It was an awesome day!
