**English**

We have been writing Information Reports and have been very busy researching an Australian animal. We learnt how to take notes, and to use these notes to write sentences and paragraphs. Eventually these were ‘published’ as a book.

**Science**

This term we are investigating the forces of push and pull. We have had so much fun investigating how toys move by using these forces. We also created some toys of our own by using a push or pull force.

**Maths**

We have been learning about three-dimensional shapes, and had fun using straws and plasticine to create some 3D shapes. Luckily we worked with a partner, because at times, it was very tricky!! We have also been using geo-reflectors to find the line of symmetry in shapes. We made some really cool symmetrical city scenes in art.

**Religion**

We celebrated a beautiful Father’s Day Liturgy with the Year 3’s. It was lovely to see so many Dads, and other family members, at our Liturgy.

**Assembly Item**

The highlight of this term has been our assembly performance of ‘Koala Lou’. It is such a beautiful story and was so wonderfully performed by the Year 2’s. Everyone was a little bit nervous to begin with, but once we started, we all had so much fun!
