**AWESOME ANGLES**

In Maths we have been learning to classify, measure and draw angles. We demonstrated our learning by designing a mini golf course and drawing the perfect shot for each hole. We then measured and classified the angles we had constructed.

**SCIENCE**

We have wrapped up our Science unit “Investigating Light”. We experimented with reflecting light and made periscopes to put our knowledge to the test.

**PAUL JENNINGS**

This term in English we have been studying the author Paul Jennings. We have looked closely at his writing style and we love the twists in all of his tales!

**TECHNOLOGY AND ENTERPRISE**

We have been learning about advertising in T and E. After looking at the persuasive techniques companies use to sell products, we have made our own adverts using the “Movie Maker.” program. We look forward to showing our adverts at our upcoming assembly!
